

# 12-Month Forecast — May 2026 to April 2027

Drafted 2026-04-29. Voice: admin documentation. Numbers anchored to docs/THE\_THESIS.md Y1 ladder (\$185k net floor / \$250k first profit / \$330k baseline) and the per-business plans in this directory.

Tracy: this exists so you have a schedule. When silence happens, look at the month, look at the number, and act on what's missing. If a month comes in within 20% of the mid-scenario row, on track. If it misses by 20%+, that's the panic line — see threshold rules at the bottom.

## One-paragraph summary

Here's where money comes from each month. Inn and Photography do the heavy lifting all year. Touring lifts the corridor and feeds the Inn but is small in dollar terms. Studio C is a flat \$1k/mo retainer plus overflow. Magazine, Records, Radio = roughly \$0 in Year 1 and that's the plan. MBT B2B (Vicki + Paul Green pilots) ramps slowly from Q3 2026. Big Muddy Acres adds o to the base case — it requires capital we don't have yet; included as upside only. Mid — scenario lands at \*\$248,800 for the 12-month window\*\* — right at the "first profit" anchor of \$250k. If we hit those monthly numbers within 20%, on track. If a month misses by 20%+ on Inn or Photography (the two carriers), that's the trigger to act, not panic.

## Month-by-month, mid scenario (the planning row)

All numbers in dollars. Mid-scenario assumes the plans in docs/presentations/plan-\*.md execute on schedule. Inn is the largest line in every month; Photography is the second carrier; everything else is supplementary or ecosystem brand value (not P&L).

| Month    | Inn    | CPP   | Touring | Magazine | Records | Radio | Studio C | MBT B2B | BMA | Total  |
|----------|--------|-------|---------|----------|---------|-------|----------|---------|-----|--------|
| May 2026 | 12,000 | 4,000 | 1,500   | 0        | 0       | 0     | 1,000    | 0       | 0   | 18,500 |
| Jun 2026 | 11,000 | 4,500 | 2,000   | 0        | 0       | 0     | 1,000    | 0       | 0   | 18,500 |
| Jul 2026 | 10,000 | 5,000 | 2,500   | 0        | 0       | 0     | 1,000    | 0       | 0   | 18,500 |
| Aug 2026 | 9,000  | 5,500 | 3,000   | 500      | 0       | 0     | 1,500    | 1,000   | 0   | 20,500 |

| Month                  | Inn            | CPP           | Touring       | Magazine     | Records  | Radio    | Studio<br>C   | MBT<br>B2B    | BMA      | Total            |
|------------------------|----------------|---------------|---------------|--------------|----------|----------|---------------|---------------|----------|------------------|
| Sep<br>2026            | 11,000         | 5,500         | 3,000         | 500          | 0        | 0        | 1,500         | 1,500         | 0        | <b>23,000</b>    |
| Oct<br>2026            | 16,000         | 6,000         | 4,000         | 500          | 0        | 0        | 1,500         | 2,000         | 0        | <b>30,000</b>    |
| Nov<br>2026            | 17,000         | 5,500         | 3,500         | 500          | 0        | 0        | 1,500         | 2,000         | 0        | <b>30,000</b>    |
| Dec<br>2026            | 18,000         | 4,500         | 2,500         | 1,500        | 0        | 0        | 1,500         | 2,000         | 0        | <b>30,000</b>    |
| Jan<br>2027            | 8,000          | 3,500         | 1,500         | 1,500        | 0        | 0        | 1,500         | 2,500         | 0        | <b>18,500</b>    |
| Feb<br>2027            | 11,000         | 4,500         | 2,000         | 500          | 0        | 0        | 1,500         | 2,500         | 0        | <b>22,000</b>    |
| Mar<br>2027            | 14,000         | 5,500         | 3,000         | 500          | 0        | 0        | 1,500         | 3,000         | 0        | <b>27,500</b>    |
| Apr<br>2027            | 13,000         | 5,000         | 3,500         | 500          | 0        | 0        | 1,500         | 3,300         | 0        | <b>26,800</b>    |
| <b>12-mo<br/>total</b> | <b>150,000</b> | <b>59,000</b> | <b>32,000</b> | <b>6,000</b> | <b>0</b> | <b>0</b> | <b>16,500</b> | <b>19,800</b> | <b>0</b> | <b>\$283,300</b> |

**Mid-scenario lands at ~\$283k**, just above the \$250k first-profit anchor and below the \$330k baseline. That's the plan.

(Note: BMA reads \$0 in the base case because Phase 1 RV cap-ex of 950k–1.6M is not yet capitalized. If Phase 1 lands by Q4 2026 with outside money, model adds 5k–15k of partial-year RV revenue. Treated as upside, not plan.)

## Per-business notes (honest annotations)

**Big Muddy Inn** — Carries the year. Seasonality follows Natchez music tourism: spring strong (Mar–May), summer dip (Jun–Aug, heat), fall peak (Oct–Nov, comfortable weather + festival routing), holidays strong (Nov–Dec), January dead. Mid-scenario assumes nightly rates hold + 2 whole-Inn buyouts in Q4 2026 + 2–3 weddings in Q1 2027. **The TBD line in plan-big-muddy-inn.md (trailing 12-month Cloudbeds revenue) is the calibration input.** Until Tracy pulls that real number, every Inn row in this table is a planning estimate, not a confirmed baseline.

**Chase Pierson Photography** — Real-estate + editorial commission work. Per docs/voice/chase-pierson-photography.md , this is editorial / documentary / hospitality — premium, selective. Mid-scenario assumes ~\$5k/mo

average across the year, weighted to Mar–Nov shooting season, lighter Dec–Feb. Rate range: 1.5k–8k per commission, 1–2 commissions per month sustained. **Risk: this line depends on Chase's outbound time. If Chase is heads-down on platform, this number falls.** Tuthill Design Photography (real-estate-only lane) revenue books separately to Tuthill, not here.

**Big Muddy Touring** — Per `plan-big-muddy-touring.md` honest range 15k–40k Y1. Mid-scenario picks \$32k. Mostly door splits (Blues Room) + booking fees on corridor runs + 4–6 Arrie Aslin private/wedding dates. **Inn room nights generated by touring acts book to the Inn line, not here** — that's a real ecosystem dollar but it's already counted in the Inn row.

**Big Muddy Magazine** — \$0 likely first 6 months. Per `plan-big-muddy-magazine.md`, honest 12-month range 0–8.8k direct (sponsored content + maybe a print subscription test in Q4). Mid-scenario picks \$6k. The real magazine value is Inn booking lift, which is already counted in the Inn row. Don't double-count.

**Big Muddy Records** — \*\*\$0 first 12 months. Be honest.\*\* Per `plan-big-muddy-records.md`, this is a 12–24 month gestation play. Cost ~\$3,500 sunk into mastering + distribution. Revenue starts (small) in Year 2. Catalog asset, not a Y1 P&L line.

**Big Muddy Radio** — \*\*\$0. Be honest.\*\* Per `plan-big-muddy-radio.md`, Year 1 cost ~\$1,500. Revenue (sponsor reads) starts mid-2027 if we hit 250+ monthly uniques. Brand value compounds; cash doesn't.

**Studio C** — 1,000/mo *retainer is the floor (paid by MBT to Studio C, but book here as ecosystem revenue from the perspective of the consolidated forecast)*. Q3 onward, +500/mo overflow as AEO and Sanity build velocity picks up. Per `plan-studio-c.md` Y1 plan total 24k–48k; mid-scenario picks \$16.5k routed through this view.

**MBT B2B (platform engagements)** — Vicki Wolpert (Woodstock real-estate broker directory pilot) and Paul Green (rock school program) are the two named pilots in conversation. Both are pre-contract as of 2026-04-29. Mid-scenario assumes one signs in Q3 2026 at ~1k/mo, *thesecond signs in Q4 2026* at 1k/mo, both grow modestly into Q1 2027. **This number can swing zero to \$40k depending on whether either pilot lands.** Honest unknown.

**Big Muddy Acres** — RV Phase 1 cap-ex is \$18–32k per site, 950k–1.6M total for 50 sites per `docs/research/big-muddy-acres-eco-tech-infrastructure-2026-04-29.md`. Earliest realistic operational date Q4 2026 only if outside capital lands by July 2026. Base case: \$0. If Phase 1 partial-open in Q4 with 10–15 sites, add 5k–15k upside. **Not in mid scenario by default — needs the capital decision first.**

---

## Three scenarios — side by side

Mid is the planning row. High and Low show the realistic envelope.

### ANNUAL TOTALS

| Scenario | Inn     | CPP    | Touring | Magazine | Records | Radio | Studio C | MBT B2B | BMA    | Total     |
|----------|---------|--------|---------|----------|---------|-------|----------|---------|--------|-----------|
| High     | 180,000 | 75,000 | 40,000  | 8,800    | 500     | 0     | 24,000   | 40,000  | 12,000 | \$380,300 |
| Mid      | 150,000 | 59,000 | 32,000  | 6,000    | 0       | 0     | 16,500   | 19,800  | 0      | \$283,300 |
| Low      | 110,000 | 36,000 | 15,000  | 500      | 0       | 0     | 12,000   | 0       | 0      | \$173,500 |

### WHAT EACH SCENARIO MEANS

**High** — Inn books 3 weddings + 2 corporate retreats + premium holiday rates hold. CPP at \$6.25k/mo average (8+ commissions). Touring fills the corridor (10+ outside acts routed). Studio C runs ~30 hrs/mo on overflow. Both MBT pilots sign + a third lands. BMA Phase 1 partial-opens Q4 with 15 sites generating \$1k each in Dec–Apr. **Lands at \$380k — comfortably above the \$330k baseline.**

**Mid** — As described above. **Lands at 283k—betweenfirstprofit(250k) and baseline (\$330k).** This is the planning row.

**Low** — Inn at the bottom of its honest range (110k).CPPcommissionsfallto 3k/mo (Chase pulled into platform work). Touring stays at the floor (Amy residency only, minimal outside acts). Studio C at retainer floor (\$12k = \$1k/mo). MBT pilots both stall pre-contract. BMA stays \$0. Magazine ships one sponsored piece. **Lands at \$173k — below the 185knetfloorby 12k.** Not catastrophic; cuts into Tracy + Amy + Chase distributions but operating costs are covered.

## Panic threshold rules — what trigger fires when

Tracy: this is the part you act on. Don't panic; act.

**Green (on track)** — Month total within 20% of mid-scenario row.

- Action: nothing. Read the report, move on.

**Yellow (attention)** — Month total 20–35% below mid-scenario row, OR Inn line alone 25%+ below mid for two consecutive months.

- Action: 30-min call between Chase + Tracy + Amy. Look at which line missed. Adjust the next 60 days, not the year.
- Examples that trigger Yellow:
  - October Inn comes in at \$11k vs. \$16k planned. (~30% miss on the load-bearing carrier — investigate why; pricing? booking flow? competitor opened?)
  - CPP zero for two months in a row. (Chase is overcommitted to platform — rebalance.)
  - Studio C overflow surprises by \$2k+ on an invoice. (Bucket discipline broke; renegotiate per `plan-studio-c.md` risk #1.)

**Red (act this week)** — Month total 35%+ below mid for two consecutive months, OR cash on hand drops below 60 days of operating cost (~\$22k for the Inn alone), OR Inn line drops 40%+ in any peak month (Oct/Nov/Dec/Mar/Apr).

- Action: same-day call. Cut a discretionary spend. Decide whether to pull a wedding deposit forward, run a flash promotion, or pause Records / Radio spend. The \$1,500/yr Radio line and the \$3,500/yr Records line are the first cuts because they generate \$0.
- Hard rule: **no founder gets a distribution in a Red month.** Tracy + Amy + Chase all hold. That rule exists so the partner trust doesn't break the first time the number is bad.

**Blue (above plan)** — Month total 25%+ above mid, sustained 3+ months.

- Action: don't celebrate; recalibrate. Pull the next year's plan forward. Decide whether to capitalize BMA Phase 1, hire the shows-and-programming role, or accelerate the second MBT B2B pilot.

---

## Where Chase's effort is highest leverage

Inn and CPP carry the year. Records and Radio do not. Touring is small dollars but high ecosystem multiplier. Knowing this, here is where one hour of Chase's time produces the most Y1 dollars:

1. **Whole-Inn buyout funnel (Q2–Q3).** One PDF, one price, one inquiry-to-booked flow. A single \$6k buyout = 4% of the Inn's Y1 mid number. Five of these in the year = \$30k = the difference between mid and high scenarios on the Inn line. **This is the single highest-leverage line item in the forecast.**
2. **Photography commission outbound.** Every \$5k commission Chase books moves Y1 by 1.7%. 2 hours of outbound per week (real estate clients, hospitality clients, editorial pitches) — `chase-pierson-photography.md` voice doc + commission-pitch email template — likely yields 4–6 net new commissions in Y1.
3. **Booking inquiry response time on bigmuddytouring.com.** Fast turnaround on touring inquiries directly grows the Touring line AND the Inn line (because the act stays at the Inn). Auto-template + 24-hour SLA on inquiries.
4. **MBT B2B pilots — close one of the two by end of Q3.** Vicki or Paul Green, doesn't matter which; pick the one closer to ready and push. Either pilot adds 6k–15k to the year.
5. **The Cloudbeds trailing-12-month pull (Tracy's task, but Chase unblocks).** Until that real number replaces the TBD in `plan-big-muddy-inn.md`, every Inn row in this forecast is an estimate. Once we have the real baseline, recalibrate the whole table — that exercise alone is worth more than any single sales action because it makes every subsequent decision evidence-based.

What is **NOT** highest leverage in Y1: shipping more Records masters (they generate \$0 this year), perfecting the Radio rotation (no listeners yet), launching the Magazine subscription model before Q4 (no list yet), opening BMA Phase 1 without the capital decision made.

---

## Operating-cost floor (what we have to make to break even)

Per THE\_THESIS, the ecosystem-level Y1 break-even is **\$203k gross**. The Inn alone carries 125k offixed cost (mortgage, utilities, Chandra, Hospitality Coordinator). The remaining 78k is split across Sprinter van operating cost, Studio C retainer outflow (note: the 12k Studio C retainer here is revenue – to – Studio – Candcost – to – MBT – net zero at the ecosystem level but each side books it differently), Records + Radiosunk costs, marketing, insurance, technology stack (Vercel + Neon + Sanity + Cloudbeds + AzuraCast = 300–500/mo), and accounting / legal.

**Net floor:** \$185k after costs. **First profit:** \$250k. **Baseline:** \$330k.

Mid-scenario forecast at \$283k clears all three floors. Low scenario at \$173k misses the net floor by \$12k — uncomfortable but not lethal.

---

## What changes this forecast (in priority order)

1. Tracy pulls the real Cloudbeds trailing-12-month number. **Recalibrate Inn rows.**
2. Chase confirms or kills the BMA capital plan by July 2026. If killed, BMA stays \$0 forever in Y1. If pursued, this forecast adds an upside row.
3. First MBT B2B pilot (Vicki or Paul Green) signs or stalls. If signs, MBT B2B line is real; if stalls past Q3, drop that line to \$0.
4. The shows-and-programming role gets named or doesn't. If named, Touring upside grows; if not, Touring stays in the \$32k mid-range.
5. Anything bad happens (Tracy or Amy burnout, hurricane, Cloudbeds outage during a peak weekend). Insurance + ceiling rule + per-event labor model are the mitigations; see the per-plan risk sections.

---

*End of forecast. Re-cut quarterly. Next recut: end of July 2026 with real Q2 actuals + Cloudbeds baseline replaced.*

---
