

A COS WALKTHROUGH · ONE SITTING · APRIL 29-30, 2026

The Whole Story

In one night we went from "Tracy's panicking about cash flow" to "we just struck gold." Here's everything that happened, in story order, with a clickable artifact at every step. Read top to bottom and you'll see the same picture Chase saw.

↓ Scroll · 16 chapters · ~12 min read

CHAPTER 01 · WHERE WE STARTED

Tracy was panicking and the docs were drifting

The session opened with two real problems — one human, one structural. Tracy couldn't see where the cash was supposed to come from. The codebase was carrying month-old stale framing.

Yesterday's full audit landed first thing: the docs and the code disagreed about who Studio C was, what MBT did, whether Tuthill was part of the platform. Battle-readiness for any customer-facing launch: **RED**. The realistic ship date kept slipping.

The Weekly Partner Commitments (WPC) system existed. The Cos ingestion rule existed. The voice docs existed. What was missing: a single picture everyone could point at and agree on.

ARTIFACT · YESTERDAY'S AUDIT (511 LINES)

Full Codebase + Docs Audit — 2026-04-29

Risk register, system map, 7-day action plan. Top critical: answerPage Sanity schema not implemented, /answers/[slug] route doesn't exist, Studio C positioned wrong in 2 canonical files, deprecated DSD onboarding still teaching the wrong sales motion.

Read

CHAPTER 02 · THE BIG-PICTURE WIN

Big Muddy Acres — A Rockstar Retirement Community

Chase's framing: a unified land, community, and creative anchor in Mississippi. Built around the studio. RV sites at \$500/month as the immediate cash-flow engine. Tiny homes as the build-out.

The candidate concepts that had been floating in the repo — The Hollow musician cooperative, the Persimmon Hollow / RRC plan, the Land & Expand tiny house community, the two-property cycle — collapsed into one thing. Big Muddy Acres absorbed all of them.

Mississippi advantage: no freeze. Above-ground PVC water lines work year-round. RV cap-ex per site drops 15-20% versus cold-climate parks. Hurricane risk is moderate inland; Adams County avoids the gulf-six wind zone. Clay soil is perfect for lagoon sewage systems — often without a liner.

\$18-32K

CAP-EX PER RV SITE (ALL-IN)

\$300K

YEAR REVENUE AT 50 SITES

3.5-5 yr

PAYBACK ON RV PORTION

ARTIFACT · THE CENTERPIECE SCROLL-DECK

Big Muddy Acres — A Rockstar Retirement Community (2,692 words)

Full magazine-style story. 14 sections. Six pole-barn renderings embedded. The piece you walk Tracy + Amy through.

[Read](#)[PDF](#)

ARTIFACT · ECO-TECH RESEARCH

Big Muddy Acres Eco-Tech Infrastructure (40+ vendors)

Real prices. Mississippi-specific. Smart submetering, lagoon systems, solar microgrids, RV park management platforms.

[Read](#)

CHAPTER 03 · THE CREATIVE ANCHOR

The Mechanical Bull Pull Barn

Pole-frame studio. Industrial-minimal finish. Big windows. Mixing console, instruments, oriental rugs. Two small bedrooms, a bath, a kitchen, the rest wide open.

Chase described the building. Vertex AI Imagen 3 generated six photorealistic renderings tonight via REST API directly from the laptop. Exterior wide, exterior entry, interior mixing, aerial site plan, kitchen, golden-hour vista from the porch. They embed throughout the BMA scroll-deck.

CHAPTER 04 · THE SCHEDULE THAT KILLS THE PANIC

The 12-month forecast

Tracy panicked because there was no schedule. Without a forecast, every silence felt like failure. Finance Director ran the numbers tonight.

Y1 mid-scenario: \$283K. Inn carries \$150K. Photography \$59K. Touring \$32K. Studio C \$16.5K. Records, Radio, BMA = \$0 (honest). Music revenue is a 12-month-out problem; Inn + Photography carry the period.

Panic threshold rules: green within 20% of mid; yellow at 20-35% miss for 2 consecutive months; red at 35%+ or cash below 60-day Inn operating cost. The schedule tells everyone when to actually worry — and when to stay the course.

ARTIFACT · THREE-SCENARIO FORECAST

12-Month Forecast — May 2026 to April 2027

Month-by-month, per business unit, three scenarios (high/mid/low). Panic threshold rules. Top 3 forecast risks. Available as JSON for future dashboard ingestion.

[Read](#)[PDF](#)

CHAPTER 05 · THE WHOLE PICTURE, IN ONE PLACE

The Big Muddy Acres briefing

Index of every plan, every PDF, every piece you'd hand Tracy + Amy on the call.

Seven business plans drafted in parallel by sub-agents (Inn, Touring, Magazine, Studio C, Records, Radio, Photography) — ~7,500 words total. Pandoc converted them to HTML. Chrome headless generated Senate-style PDFs. The touring destinations map (35 towns, 4 tiers) joined the set.

ARTIFACT · THE HUB

BMA Briefing Index — Tomorrow's Call

10 cards. Every business plan, the forecast, the centerpiece scroll-deck, the touring map. PDF download next to every page.

[Open](#)

CHAPTER 06 · THE PRODUCT LOCKED

MBT — SaaS + Service hybrid, billed in tokens

Chase locked it in one sitting. MBT is a chatbot-first hybrid. Software tokens for AI work. Human tokens for the team work AI can't do. Same chat meters both.

The pieces fell into place: Studio C IS the operating company that runs MBT. Open Notebook is the data layer. The 30+ specialist agents are the routing intelligence. The 6-tier pricing — Free, \$20 Standard, **\$100 Service (the target sell)**, \$200 Operator, \$500 Business, Enterprise — covers the whole audience from tire-kicker to enterprise contract.

The \$100 tier is the killer. ChatGPT, Claude, Gemini are all \$20/mo. The MBT \$100 tier adds premium models AND access to a human when the chat hits a wall. No competitor offers human-on-call at any consumer price.

Software is cheap. Humans are the premium. We bill them differently because they are.

— THE MBT PRICING TAGLINE

ARTIFACT · THE LOCKED PRODUCT SPEC

MBT Product Definition — SaaS + Service

The full spec. 6-tier pricing table. Token model. Studio C as operating company. Vertical deployments (S2PX absorbed as scanning vertical). Interface choice (web / terminal / Apple Notes / ClickUp / custom). Custom builds also token-billed.

Read

CHAPTER 07 · THE CHAT SHIPPED

Studio C Chat — Live tonight

vercel-plugin:ai-architect built the MVP in one session. Then upgraded it with the router. Both shipped.

Streaming Anthropic Sonnet. Loads the full Big Muddy context (CLAUDE.md + thesis + product def + forecast + AEO answer blocks). Creates Asana tasks via the `create_task` tool when escalation is needed. The router upgrade added 10 specialists — Patch, Finance Director, Gallery Director, Bearsville Studio, R&D Touring, Mac Mini Photo Lab, North Star, QA Agent, Insurance & Risk, Cos as catch-all.

Test query: *"The build is failing in CI — what would you check first?"* The router picks Patch and renders a specialist card with an accent border that streams Patch's debugging steps inline.

TO USE IT TONIGHT

- Run: `cd /Users/chasethis/hillbilly-dreams/apps/web && pnpm dev`
- Open: `http://localhost:3000/chat`
- Add `ASANA_PAT` to `.env.local` for escalation to fire

CHAPTER 08 · NAMING THE TREND

Inverted Intelligence

As AI gets better at the cognitive work humans were valued for, the value of human work inverts. The things only humans can do — show up, take accountability, hold a room — become the premium layer. We priced for it first.

The thesis became the brand. The brand became a radio show. The radio show becomes the marketing. Customers self-select into the thesis, then convert.

Chase registered **invertedintelligence.fm** within the hour of locking the concept. CLAUDE.md updated to 15 active domains. Domain points to a coming-soon page once DNS propagates.

ARTIFACT · THE BRAND THESIS

Inverted Intelligence — Concept + Pilot Plan

Full thesis. Radio show format. Marketing narrative across surfaces. Pilot strategy: Natchez first, Woodstock second, then wide. The MBT token model is the product expression of the thesis.

Read

CHAPTER 09 · TEN WAYS TO EXPLAIN IT

Tokenomics — 10 design approaches, 1 master page

Chase wanted the same concept explained ten different ways — different art directions, not different colors. Ten sub-agents went off at the same time. Each came back with a fully different visual language.

Magazine narrative. Visual manifesto. Interactive widget with sliders + live meters. Pure-numbers comparison tables. Heritage journal with drop cap and ornamental rules. Punchy social copy in card grid. Show-business analogy (Tuesday cover vs. Friday headliner). Honest no-marketing cut. Enterprise sell-sheet. Wildcard "Cost Oracle" carnival fortune-teller.

Each one's CSS is namespaced so they can sit on the same page without bleeding into each other. Iframes hold them apart on the master comparison page. They become the initial template library — customers picking a workspace style at signup choose from these 10.

Tokenomics — Initial Template Library

Ten sections, ten art directions, one comparison page. The eventual workspace template gallery for MBT customers.

Open

CHAPTER 10 · THE CAMPAIGN

"AI Tells You. We Do the Rest."

Boomer-meets-AI ad campaign. Single repeatable script template. Twenty topical swaps. The boomer is bewildered, the Gen Z is exasperated, the AI is the antagonist, Studio C is the relief.

AI: "I just told you exactly how to set up a web server and start your own podcast. Ten easy steps."

[Person stares.]

Card: "You don't have a clue where to begin. We do. We do the rest."

— THE MASTER SCRIPT (EVERY AD USES THIS)

Production: shoot on iPhone, real boomer + real Gen Z (no actors), 15-30 second cuts for TikTok / Reels / Shorts, static image variants for IG and X. The "Ten Easy Steps" running gag holds the brand together across infinite topical variations.

"AI Tells You. We Do the Rest." — Full Campaign

Master script. 20 topical swaps. Voice rules. Production notes. Distribution plan.
Recommended first 3 to shoot.

Read

CHAPTER 11 · THE UNLOCK

The Artist Equity Model — Tiny Houses for Records

Two prior business lines that each had a "but how does it actually work" question. Big Muddy Records: how do we sign artists without cash? Big Muddy Acres: how do we get the first marketing attention? Each solves the other's problem.

The first deal: Robert "Chicken" Burke produces a record. We value the record at \$50,000. Instead of a cash advance, he gets a tiny house (or meaningful share) at Big Muddy Acres. He becomes the first resident-artist. The press around the trade — covered in music press AND real-estate press AND alt-economics press AND lifestyle press — IS the marketing campaign.

Land math: Adams County rural land at \$1,500-\$3,500/acre. 100 acres = \$150-\$350K, well within the Phase 1 capital band. Enough land for the full 5-year vision is less than 25% of Phase 1 capital.

THE 5 DECISIONS ONLY CHASE CAN MAKE

- Chicken — does he want this deal? (Saturday meeting timing)
- Land — specific parcel in mind, or scout needed?
- Entity — who holds the land (MBT, a2natchez, new SPV)?
- Acquisition — close before pilot or lease + option first?

- Press timing — is Chicken willing to be the cover story?

ARTIFACT · THE STRATEGIC DOC

Artist Equity Model — Tiny Houses for Records

Concept locked. First deal scoped. PR angles to shop. Cascade plan across BMA + Records + Inverted Intelligence + Outsider Economics + the campaign.

Read

CHAPTER 12 · THE HARD TRUTHS

Battle-readiness audit — Currently RED

Chief of Staff agent ran the audit. Honest verdict: the chat MVP is a demo, not a product a Natchez customer can sign up for, pay for, and use without Chase / Cos / Patch in the loop.

Realistic ship-to-Natchez date: **Friday May 22 (3 weeks)**. Three highest-leverage gaps: (1) wire ASANA_PAT, (2) build the token meter and Stripe metering, (3) publish the pricing page + Inverted Intelligence narrative on a customer-facing surface.

Critical bugs the audit caught: `apps/web/lib/big-muddy-context.ts` reads `process.cwd()` — works locally, breaks in Vercel Production. No rate limiting on `/api/chat`. Open Notebook backend referenced as Mac mini @ 192.168.4.37, but the Mac mini is OFF.

ARTIFACT · THE AUDIT (3,200 WORDS)

Battle-Readiness Audit — 7 Objectives, Red/Yellow/Green

Per-objective assessment. Critical path. What can ship in parallel. The Studio C role decision is the gating prerequisite — Chase must lock it by Monday May 4.

Read

CHAPTER 13 · THE FACE OF THE COMPANY

Studio C — Service Page

Studio C uses MBT as the tech wrapper, plus all LLMs, plus the full software suite, plus know-how, plus a subcontractor network (Fiverr + relationships). Routing IS the value. AI helps the routing decision. Customer never sees the layered fulfillment.

ARTIFACT · INTERNAL SERVICE PAGE (1,180 WORDS)

Studio C — How the Service Works

Above-the-fold value prop. The model (software → agents → humans). The fulfillment stack honestly named. Pricing table with \$100 Service highlighted as recommended. How to start. What Studio C is not.

Open

PDF

CHAPTER 14 · THE TEAM CONVERSATION

Pitch to Elijah + Miles

Bearsville Studio Agent drafted the internal pitch. Elijah becomes Chief of Staff. Miles is Production. They immediately develop the outside resources roster — 50 vetted vendors across 10 categories within 2 weeks.

Software answers cost software-token rates. Human answers cost human-token rates. The customer sees both meters. We see both meters. Everyone knows what the human work is worth.

— FROM THE ELIJAH/MILES PITCH

ARTIFACT · INTERNAL PITCH (~2,050 WORDS)

The Pitch to Elijah + Miles

What we're selling. Why now. Their roles. What we have today. What we need immediately. Marketing plan. The math. Battle-readiness honest cut. What we need from them starting Monday.

Read

PDF

CHAPTER 15 · THE NEXT LAYER

Navigation architecture deep analysis

North Star agent ran the architectural assessment. Three urgent recommendations.

One: collapse 9+ bespoke layouts into a single EcosystemFrame component with three variants — Reader, Operator, Conversation. **Two:** tenant-scope the middleware pass-through paths (today every domain serves every path — `outsidereconomics.com/records` silently renders `Records`). **Three:** bind the chat to its tenant — `/chat` hardcodes "Big Muddy" but the bypass is global; a Bearsville user sees the wrong brand.

Verdict on chat-as-nav: Chat IS the primary navigation in 18 months. Ship today as the *dominant secondary* — every reader surface gets a prominent chat icon, static nav stays for SEO/AEO and first-touch. Defense in depth.

ARTIFACT · ARCHITECTURAL ANALYSIS

Navigation Architecture Deep Analysis

Current state map. Identified problems with file paths. Architectural recommendations. Migration path. Conventions doc. The chat-as-nav verdict. Open questions for Chase.

Read

CHAPTER 16 · WHAT SHIPS NEXT

The list, in order

Realistic ship-to-Natchez: May 22. Here's what closes between now and then, in the order they have to close.

CRITICAL PATH (MUST CLOSE BEFORE LAUNCH)

- Chase decides Studio C role lock by **Monday May 4** (gating)
- Chase confirms Chicken deal by **Sunday May 4**
- Wire ASANA_PAT (5 min)
- Fix big-muddy-context.ts (Vercel Production bug)
- Build token meter + Stripe metering (1-2 weeks)
- Publish pricing page + Inverted Intelligence narrative on at least one customer surface
- Tracy structures the entity for land hold + artist equity (1 week)
- Bind chat to its tenant (architectural fix)

IN PARALLEL (CAN SHIP ALONGSIDE)

- Patch crawlability + llms.txt cleanup (1 day)
- Onboarding bundle DEPRECATED banner (Cos)
- Generate canonical .env.example for Elijah/Miles bootstrap
- Open Notebook deploy on Hetzner (1 hour now SSH works)
- Scout land + start tiny house design
- Press kit drafted for Chicken deal
- Inverted Intelligence Episode 1 recorded with Chicken
- Apple Notes + Reminders integrations (week of May 5)

THE STANDING SURFACES (LIVE NOW)

- [Studio C Chat](#) — live with router + 10 specialists (Anthropic Sonnet streaming)
- [Big Muddy Acres briefing](#) — full deliverable for partner call
- [Studio C service page](#) — internal positioning page
- [Tokenomics — 10 approaches](#) — initial template library
- [Local dashboard](#) — everything in one place

That's the whole story.

Every piece talks to every other piece. The chat needs the router needs the specialists needs the tokens needs the human service layer needs Studio C as the operating company needs the Inverted Intelligence narrative needs the

campaign needs the brand needs the customer flow. None of it is a one-off. It coheres.
